

GENESEE FOUNDRY COMPANY,

OFFICE : 10 BROWN'S RACE.

WM. GLEASON, PRESIDENT.

AMOS WALDER, MANAGER.

San Antonio
ROCHESTER, N. Y., *Oct 11* 189*5*

Dear Daughter

your letter of Oct 2nd reached New Orleans after we left and I have just received it the adjustment of centre of tail stock. Referred too by Farrell Edgley Mr Brown showed me a sketch of the Movable head. Which had in it an adjustable tail spindle the arrangement for adjusting I did not believe to be as good as the one I made for the Mc Donnell 35" tail stock the screen cap nut and adjusting arrange^{ment} is all he wants have Mr Doherty make a copy of that part and send it too them the reason I did not send it I did offer to send it but ^{from} Mr Brown's manner he did not seem very anxious. but it seems I was mistaken. according to present arrangements I will leave here next Monday. I am at present studying the Router and may have to change my plans on account of the difficulty of getting a time ticket at a reasonable price

I must have 10 days to make the trip and
the \$42. ticket is limited to 4 days. I may buy
2nd class part of the way, and buy in section
from here to New Orleans then to Atlanta
and from there home. I don't see any other
way at present. Ellen has had a little set back
She caught Cold in some way and had a
bad night. ^{coughing} She is quite strong able to walk
nearly past them when we first came. I believe
the set back only temporary. if she improves
I will start Monday if not I will not start until
there is a change. Eleanor is going to school
every day. She passed the Exam the principal
gave her all O.K. I visited the Machine
shops in this town. I got acquainted and
that is about all that I can say. they are
very crude affairs general fiddlers. the
largest lathe in either of them is a 36" and
not many of any kind. the city is purely
commercial. very clean built of white stone or
white brick. for fuel they burn wood. except the
pen house and the electric ^{burning} coal. Soft coal is \$7.50
hard coal. 12 per ton. there is a native coal that
is cheap but it is very poor. I will write again
in the morning and report how Ellen gets along. William &

I am glad you received these Orders
