Nov 1st 1898

Dear Kate I am here yet
I expect to leave here for
Glasgow on the 3rd. I have been
too ~~to~~ Hollingworths this
afternoon but did not get
through there and am going
out there in the morning.
I dont know whether I will
be able to do anything with
the files gear or not I think
Hollingworth has something up

his sleeve but so far has not
shown it. there is not the
least doubt however but
there will be a good sale for
gear Planers as they are
abandoning the Cut's use
of cast gearing. and the
other Methods in use here
are very ancient.

Schurcil has two very bright
Men here. located in Manchester
both Machinists. but never
seen a gear Planer in motion
until this fore noon. What
we need is a good man here
that could go in too the
shop and run the Machine

if Andrew could be spared
there is a big field here but
we can talk that over later.
I could stay here indefinitely
and find something new
every day. the heads of
departments dont get to work
before 10 and generally take lunch
at 1.2.16 when they frequently
dont turn up after that event
but they generally despatch a good
deal of business in a short
time they dont know any
thing about why I called on
Mr Reynolds and he treats
me very nicely. Mr Bullard
is here yet together with
Churchills then makes it

More Enjoyable than it
Otherwise would be. I am
Anxious too get home
and start instructing the
fisher gear. We will have
to have some references
and a longer test before
getting those Conversative
People to take it up
My love too all

William Gleason
