Berlin, den Nov 14 1898

Dear Kate

I received  
yours of the 1st also  
the gear biscuits sent care  
of Mr Kart & Shutter. I did  
not come by way of London  
consequently did not get  
those <sup>sent</sup> <sup>to</sup> I have got through  
here and start for Vienna  
in the morning. I planned  
a sample steel gear too he  
sent to Krupp's one of  
there Engineers was here  
to see me and extended  
to me an invitation to  
visit them and promised  
to show me around but  
I won't go it is so hard to

get along once off the  
Sawage I tried to get out  
of going to Sierra but

A & S were very pressing  
so I consented I may be able  
to start for home by the  
23rd or at latest by the 26th  
I have had a heap of experience  
and on the whole I am of an opinion  
I can show you a gear plane  
nearly as good as Gitzner  
I told Shuckart & S they  
might add \$50 to the price  
of the 36" G P and we would  
put an cut on too prevent  
the tool scoring the tooth  
when being withdrawn from the  
cut I planed a gear with out  
any marks in it but it took  
longer than it ought besides the

Krupps are dealing with  
the Government, and the  
inspection is very a strict  
we have only to put on some  
little oil to lift the bar <sup>the</sup>  
On the top side Jim & my self  
has already talked over the  
matter and there are at least  
10 Or 20 different ways it  
may be done and without  
much additional Expense

---

in consequence of the state of the  
Lath trade I don't see any use  
in calling at Harre as he  
cannot talk business besides  
I heard in Manchester that the  
firm has not been making  
Money in fact has been losing  
Bullard has sold them a  
big lot about two years  
since they are getting a big  
Lath trade in Manchester

and they had to Run up what  
to cash with the Obed. I think  
~~you will have time to let~~  
~~case Democrat as you will get~~  
~~this letter by the 22nd and it~~  
~~is nearly certain that I will~~  
~~be in Paris on the 23rd~~  
So I will give them the go by  
the Year Review trade is  
going to be good here  
Of course it is impossible  
to tell for how long at  
any rate it has to take  
Precedence of the Lathes  
and coming to that point  
I would rather let the matter  
rest until I arrive home  
which will be in 8 or 10 days  
after you receive this letter

Berlin, den 189

Mr Whittlesey's financial  
aff. can also wait  
regarding Bill Blake  
& Co I think the best thing  
they could do would be to  
protect them selves in any  
way they can as it would  
not be possible for us to  
do much for them in a  
hurry I would willingly sell  
the Lath Pattern special  
tools & drawings but I do not  
like the B. & S. Idea there  
is too much dead matter  
there and I think Mr Perrin  
is punished sufficiently  
already he sides you know  
he is old and likely too deep to

On short notice and I don't  
see how they are going to  
sum up. He is gone they have  
not any gear cutters nor  
any facilities for handling  
the big work but we can  
discuss it later. We may  
be able to cook up some  
other scheme

My love to all  
from Gleason
