with private Bath. All modern Improvements.

JOHN CHATFIELD.

New York, Oct 11 1898

Dear Kate, I visited R Gore
& Co this morning I did not
know when I left home that
they had ordered a gear
blower. But Mr Collins
assured me they had ordered
a 24" and Mr Meade said
they had ordered. But did
not remember the size. They
are in a hurry for it I found
they have the old difficulty on
all of the forms being torn
down. But most of their
trouble comes from poor
setting. The Man made a
statement that you might
blame a pair of gears appeared
to be all right for day and
the same size gears a day later.

Would often he never know
he made the statement in
Mr. Collins presence. and he
recognised at Once. that it
was the Operators fault. I admit
however that there was a slight
defect in the machines and
explained the reason he is
quite taken with the remaining
form. and I promised to
put on the remaining chuck.
it is agreed between Mr. Mead
and Mr. Collins that after
testing the new machines
and it proves O.K they will
send the Old Ones to Rochester
One at a time as he attests
Over with Reproving form
will say they were very
pleasant with me. Sam Barker
My Dear &c

Wm. Gleason
