

 LICK HOUSE

GEO. W. KINGSBURY, Prop. & Mgr.
CHAS. W. PENNIMAN, Asst. Mgr.

SAN FRANCISCO, CAL.,

April 17 1906

My dear family I arrived here

On the 16th 27 days from Panama
to this Place 6 days over due
I leave for Portland by Rail
this Evening. I won't stop
at Sacramento until on
the return. I received your
letter of the 4th I had not heard
of Miss Anthony's death until
I received the letter but I was
prepared for it as her condition
was serious when I left San
very sorry she was a
Gable Woman. and I admire
her ~~there is~~ there is only about
one of her kind in a century
I am glad to hear that Merrill
Bristol is better

I am pleased to hear that
things are going smoothly
and that you have decided
to cut out most of the arts
work also the limiting of
the Packard work to 600
sets instead of 1000 I feel that
it was the proper thing to
do I am glad that the Contra
for the Pattern Storage is
let also the Improvement
of the grounds. we were as
cut off from the world from
the date we left New York
until our arrival here
as if we were buried the
Panama paper did not have
any thing about the Algiers
Conference. and I don't regret
how it was settled. I will be
in Portland Thursday morning
I had a letter from Elinoe
I expect more and later news

SAN FRANCISCO, CAL.,

as soon as I arrive in
Portland. I had a congratulatory
birth day card from De laze
also a postal from the
Canadian Pattern Co. about
the additional fee let it
lapse. the friends that was
with me on the ship I find
to be very fine people we are
about to start in a touring
car around the city we
are booked on the same
train for Portland. I called
on Mr. Sherry at his place
of business. he went up to
his house. but I did not
have time. I promised to
call on my return. there is
a number of things I am looking

forward to with some pleasure
I expect to visit Anders
and Edith in their new
home. also the number of
additional improvements
of the new shop. such
as the pattern storage the
transfer table I expect is
complete. also the gift cases

heres the record of the Old
Ship I came here on built
in 1873 boilers 23 years old
allowed to carry 45 lbs of
steam could when every
thing was favorable make
9 miles in one hour but
mostly about ~~7~~ 6 or 7
knots to all
William. Gleason
