Anti- trust Congress —

Let me call your attention to the fact that the largest monopoly—the grossest trust of the world is that of man's conspiracy to govern women without their consent, to take from them to sweat under, to make, to withhold their consent to, laws, to the law-makers, to law-enforcers. While the codes of constitutions thus empower men to hold women in subjection, to control their work, to wage war in marriage to legally own the proceeds of the labor of their wives—the logical sequence must be that whereas an individual man, or a set of men of their own sex can outwit one or many, and subjugate profits of their victims, to their own selfish greed, they will do it, and with just as little compunction of conscience as if the man were just man.
Therefore reached - that we urge upon all the women of all the organizations of our General Federation of Labor to make of themselves a balance of power within their own political parties to secure the elimination of the word "male" from the suffrage clause of their General State Constitution.
